

Turmericle

What is Turmericle?

Turmericle is a unique powdered blend of well researched nutraceutical herbs including two varieties of turmeric, black pepper and resveratrol, which may assist with conditions such as joint inflammation and skin conditions. Combined with our own powdered coconut oil, this easy to feed powder is suitable for horses, and dogs.

About the Ingredients

Turmeric

Turmericle contains a blend of two different species of turmeric to optimize the benefits they both offer. One form, *Curcuma longa*, is the traditional type of turmeric commonly used in cooking, foodstuffs, cosmetics and medicine. *Curcuma xanthorrhiza*, has been used as a traditional medicinal plant in some tropical countries such as Indonesia and Malaysia. It contains the xanthorrhizal oil which confers unusual benefits.

Power Stance® powdered coconut oil

Power Stance® is powdered coconut oil designed to make feeding oil easy. Coconut oil contains high levels of medium chain triglycerides (MCTs) which provide the body with a readily available source of lauric acid, which converts to monolaurin and may provide anti-bacterial, anti-microbial and anti-fungal properties. The benefits of supplementing animals with coconut oil may include improved digestive health, enhanced coat and skin condition. Coconut oil is absorbed directly into the portal blood, and therefore is metabolized faster than other oils.

Ground Black Pepper

Curcumin is treated as a foreign substance by the liver. It is therefore rapidly metabolized and excreted. Piperine in black pepper blocks curcumin excretion by the liver and increases curcumin bioavailability. Piperine activity is reduced in sunlight. Turmericle must be stored in a sealed container to maintain the efficacy of the black pepper.

Resveratrol

Resveratrol is produced in plants to maintain their general health. Normal body functioning gives rise to free radicals with production greatly increased during inflammation and stress. Resveratrol has been added to Turmericle as it is an antioxidant that may help the body efficiently detoxify these free radicals and shows signs of being cardio-protective, anti-cancer and anti-inflammatory. The resveratrol is derived from Japanese Knotweed.

PACKAGING: 1 lbs., 5 lbs. and 15 lbs.

Feeding Rates for an 1100 lbs. animal:

- Turmeric should be introduced gradually into diet over a two-week period.
- Daily Dosage Horses and Livestock:
- 1 oz. AM and PM with feed

Dogs

Add to feed in two separate feedings (g/day). For example, a 30 lbs. dog would get 1/2 tsp. in the morning and 1/2 tsp. in the evening with his food or with a treat. Liverwurst works well for most dogs with the Turmeric folded into it. Feeding more than the recommended dose is not recommended, but feeding more often sometimes does better.

Weight (lbs.)	Teaspoon	Grams
<11	1/4	1.25
11-22	1/2	2.5
22-33	1	5
33-66	1.5	7.5
>66	2	10

If your horse or dog has a pre-existing condition, is currently on medication, has a planned surgery, or is pregnant, it's advisable to talk to your vet before adding turmeric to his/her daily diet.

How long will a container of Turmeric® last?

- 1 lbs. large animals: 8-10 days
- 5 lbs. large animals: ca. 40 days
- 15 lbs. large animals: ca 120 days
- 1 lbs. small animals: ca. 25 days
- 5 lbs. small animals: ca. 125 days

Which animals may benefit from Turmeric®?

Livestock (horses, pigs, sheep and cattle) and companion animals (dogs, cats and birds).

What may Turmeric® be used for?

Skin allergies and sarcoids; circulation and blood flow; inflammation of joint
